Notice:

1.How to distinguish the power source is broken or not?

if the led light is fine,there would three possibles.

The first is led bead light full on or micro-light.

The second is led bead all light on but flash constantly.

The last case is led bead don't light at all. For this situation,you need another good power supply to replace.Otherwise,you will not to judge the led light or the power supply which is not work.

2.Becuse of different production batch,the appearance of the products may be a little diverse. Due to transportation ,installation,environment and other reasons,the product may have bad conditions,it is necessary to buy one or two more space.

3.As we are a wholesaler, it is normal to have one or two bad products in a large number of order. And if there are many bad products in a batch, or within the warranty period. Something goes wrong with the product that not beauce of bad usage, we promise to replace.

About Power Supply

1.You should buy power source according to the wattage of the lamp,otherwise there will be no light,fried light, flashing,etc.

2.Some power supply is able to be connected to two led lights . Be careful the total power of the two led lights shloud not exceed the power of the power supply.
