

10 Mm Deep Aluminium LED Profile With Flange With PMMA Opal Matt Diffuser

Our Product Introduction

Basic Information

- Place of Origin: Shenzhen China
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YS-BAPL013
- Price: Negotiable
- Delivery Time: Within 48 hours
- Payment Terms: T/T
- Supply Ability: 100,000 meters per week

Product Specification

- Product Description: 10mm Deep Aluminum LED Profile With Flange, Option 1), PMMA Opal Matte Diffuser, 2), PMMA Semi-clear Matte Diffuser, 3), PMMA Clear Diffuser
- Highlight: **10 Mm Aluminium LED Profile, Matt Diffuser Aluminium LED Profile, Aluminium LED Profile With Flange**

Product Description

10mm Deep Aluminum LED Profile with Flange Equipped with PMMA Milky White Matt Diffuser is a professional lighting component, commonly used in commercial and industrial lighting solutions. Here are some key features and benefits of this product:

1. **Material & Design:**

- Aluminum Profile: Aluminum is a lightweight but strong material with good heat dissipation performance, which contributes to the stable operation and long life of LED lamp beads.
- 10mm Depth: This depth provides enough space for LED lamp beads while keeping the profile compact.

2. **PMMA Milky White Matt Diffuser:**

- PMMA (Polymethyl Methacrylate) is a transparent plastic with excellent optical properties and weather resistance.
- Milky White: This color can provide soft and uniform light, reduce shadows and hot spots, and create a comfortable lighting environment.
- Matte Surface: Matte treatment reduces direct reflection of light, helps avoid glare and improve visual comfort.

3. **With Flange:**

- Flange is a disc-shaped component that is usually used to fix and support the profile, making it easy to install and adjust.
- The presence of flanges allows the profile to be fixed more stably on various structures, such as ceilings, walls or brackets.

4. **Application scenarios:**

- Suitable for places that require soft lighting, such as offices, hospitals, schools, museums, etc.
- Also suitable for environments that need to reduce visual fatigue and improve work efficiency.

5. **Installation and maintenance:**

- Due to the design with flanges, the installation process is easier and faster.
- Aluminum profiles are easy to clean and maintain, which helps to maintain the long-term performance of the lamp.

6. **Heat dissipation performance:**

- The high thermal conductivity of aluminum helps to dissipate heat quickly and protect the LED lamp beads from overheating damage.

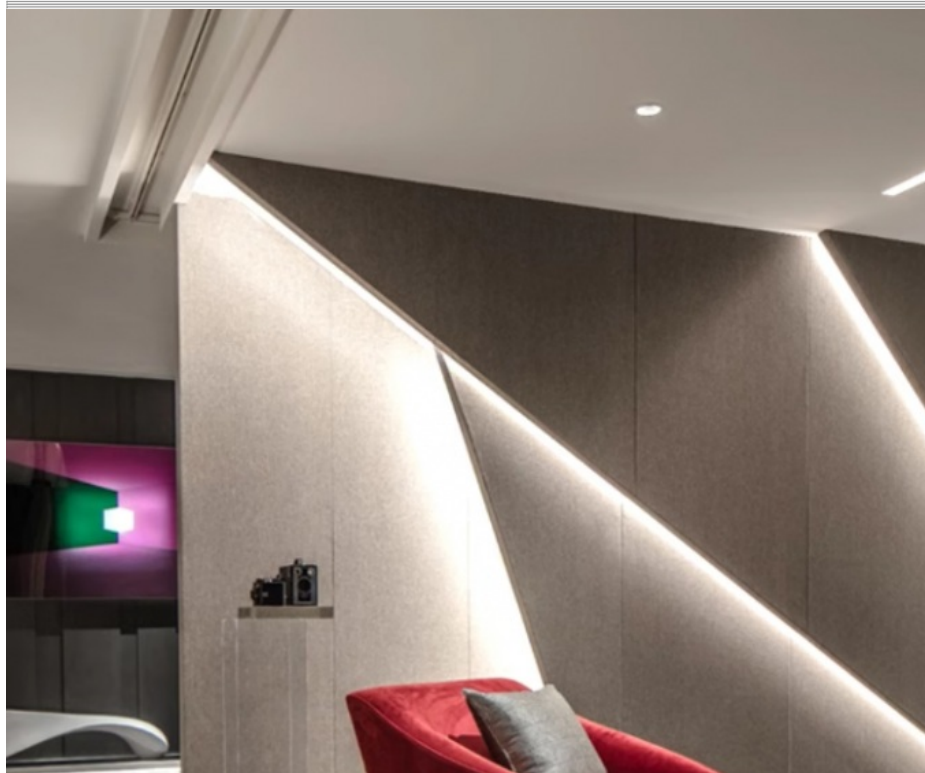

7. **Customization options:**

- Depending on the specific needs of the customer, the length, color and type of diffuser of the profile may be customized.

8. **Environmental characteristics:**

- PMMA material is recyclable, which helps to reduce environmental impact.

This combination of LED profiles and diffusers provides an efficient, beautiful and practical lighting solution suitable for a variety of commercial and industrial environments.
