## Product Description

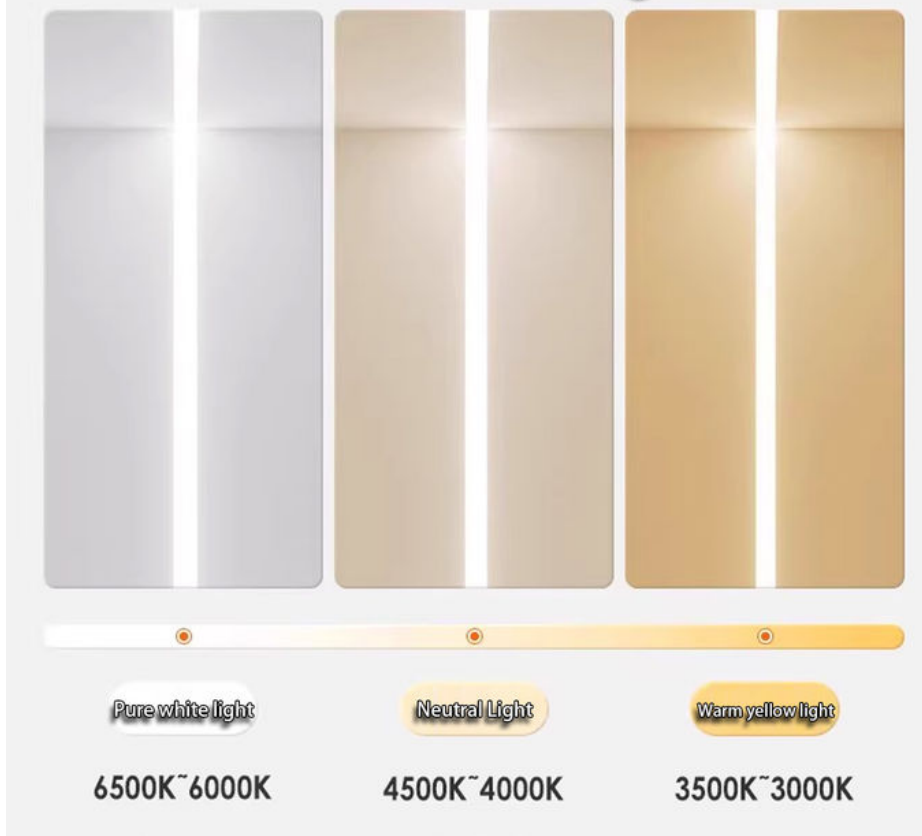

**LED embedded aluminum alloy light trough linear light strip U-shaped aluminum profile linear light living room ceiling linear light strip products, as a common lighting solution for modern homes and commercial spaces, have many advantages and characteristics. The following is a detailed introduction to the product:**

### Product Overview

LED embedded aluminum alloy light trough linear light strip combines the energy-saving and high efficiency of LED lighting with the durability and beauty of aluminum alloy materials. It is suitable for living room ceilings, commercial display cabinets, offices and other places. Its U-shaped aluminum profile design not only provides good heat dissipation performance, but also ensures the uniform distribution of light, creating a warm and comfortable lighting environment.

## Available In Three Light Colors

### **Product Features**

**Energy-saving and efficient:** Using LED as the light source, compared with traditional lighting products, it has lower energy consumption and longer service life, which can greatly reduce the cost of use.

**Beautiful and generous:** The U-shaped aluminum profile has smooth lines and a simple and generous appearance. It can be perfectly integrated with modern homes and commercial spaces, improving the overall decoration level.

**Uniform light:** Through the carefully designed light trough structure, ensure uniform light distribution, reduce glare and shadows, and create a comfortable lighting environment.

**Easy installation:** The product supports embedded installation and can be closely combined with ceiling and other decoration materials. The installation process is simple and quick, reducing the difficulty and cost of construction.

**Strong durability:** The aluminum alloy material has good corrosion resistance and oxidation resistance, can withstand harsh environments such as moisture and mildew, and extend the service life of the product.

### **Product specifications and parameters**

Since product specifications may vary from manufacturer to manufacturer and brand to brand, the following is a general parameter range (for specific parameters, please refer to the actual product manual):

**Material:** Aluminum alloy

**Light source type:** LED

**Color temperature:** You can choose a variety of color temperatures such as warm white, neutral white, and cool white according to your needs

**Power:** Depends on the actual length and brightness requirements, generally ranging from a few watts to tens of watts

**Size:** The width, height, and length of the U-shaped aluminum profile can be customized according to actual needs

**Protection level:** Usually has a high waterproof and dustproof level, suitable for a variety of environments

### **Application scenarios**

**Home decoration:** ceiling lighting in living rooms, bedrooms, restaurants and other spaces

**Commercial display:** display cabinet lighting in shopping malls, supermarkets, specialty stores and other places

**Office space:** lighting decoration in offices, conference rooms, corridors and other areas

Purchase suggestions

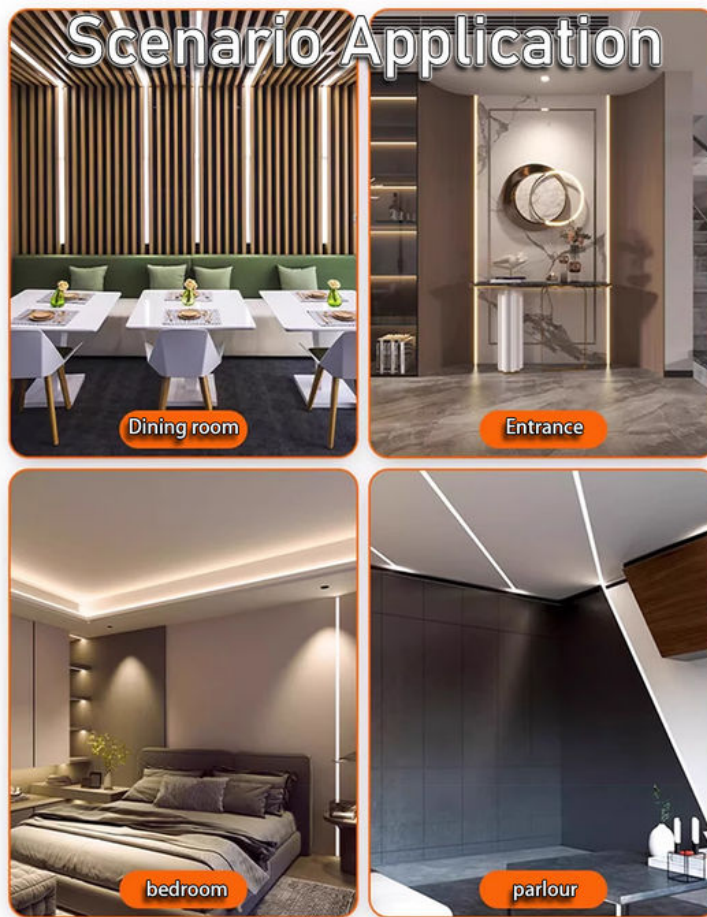

When purchasing LED embedded aluminum alloy light trough linear light strip U-shaped aluminum profile linear light, it is recommended to pay attention to the following points:

**Brand reputation:** Choose well-known brands such as YSENLED to ensure product quality and after-sales service.

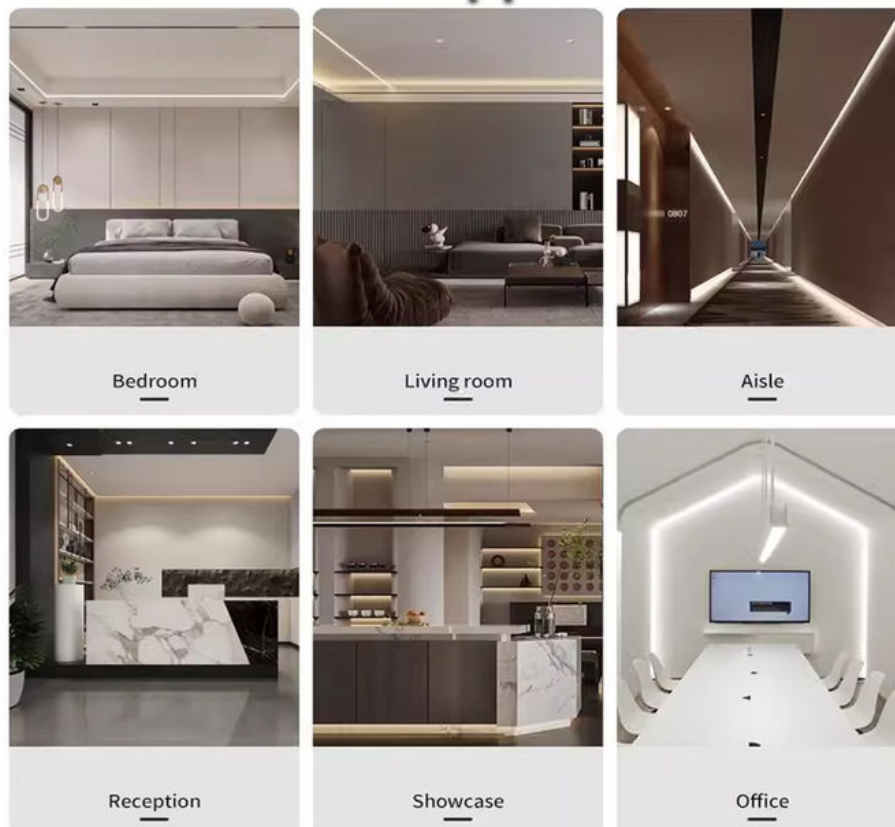

**Specifications:** Select appropriate specifications according to actual needs and installation environment.

**Price comparison:** compare the prices of different brands and merchants, and choose products with high cost performance.

**After-sales service:** understand the merchant's after-sales service policy to ensure that problems encountered during use can be solved in a timely manner.

## Scenario Application

In short, LED embedded aluminum alloy light trough linear light strip U-shaped aluminum profile linear light is a lighting product that combines beauty, practicality and durability, which can bring a more comfortable and energy-saving lighting experience to your home and commercial space.
