Product Description

LED light strip colorful color change living room ceiling three-color home intelligent remote control atmosphere light neon waterproof RGB light strip is a lighting product that integrates multiple functions and is widely used in decorative lighting for homes, businesses and entertainment venues. The following is a detailed introduction to the product:

1. Product Features

Colorful color change: The light strip supports multiple color changes, including red, green, blue, purple, yellow and other basic colors and mixed colors, which can create a colorful visual effect to meet the needs of different scenes and atmospheres.

Intelligent remote control: Equipped with an intelligent remote control, users can easily control the switch, brightness adjustment, color change, etc. of the light strip through the remote control to achieve remote control and personalized settings.

Three-color home use: In addition to colorful color change, the light strip also has a basic three-color (warm white, white light, neutral light) mode, which is suitable for daily home lighting needs.

Atmosphere creation: Used as an atmosphere light, it can enhance the artistic sense and layering of the space, and add a warm, romantic or mysterious atmosphere to the living room, bedroom and other spaces.

Neon waterproof: It adopts a waterproof design and is suitable for use in humid environments or outdoors, such as bathrooms, balconies, etc. At the same time, the neon effect is more prominent and increases the decorative effect.

RGB light strip: RGB represents the three basic colors of red, green and blue. By controlling the different brightness and combination of these three colors, almost all color changes can be achieved to meet diverse lighting needs.

2. Technical parameters (taking a certain brand product as an example)
