

Customizable Linear Light Embedded Black LED Gypsum Ceiling Light for Living Room

Our Product Introduction

for more products please visit us on led-stripslights.com

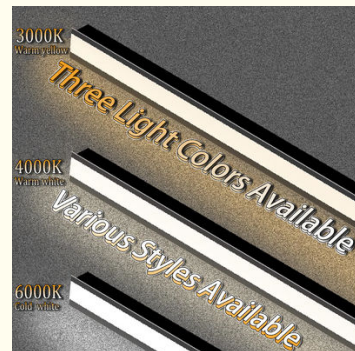

Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YSR60X5630RA-F3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100,000 meters per week

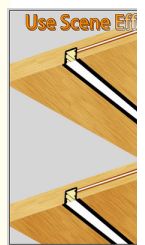

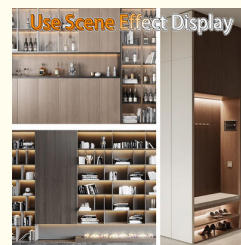

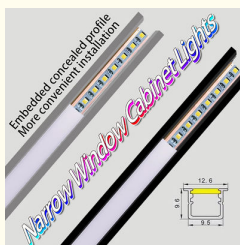

Product Specification

- Lamp Body Material: Copper,PVC
- Power Consumption: 72W
- Quality Certification: CE Certified
- Power: 5W
- Certifications: CE, RoHS
- Size: 50cm
- Customized Design: Available
- Color Temperature: 3000K/4000K/6000K
- Light Color: White
- Waterproof: Yes
- Type: LED Aluminium Profile
- Materials: High-quality Aluminum Alloy
- Price Range: From A Few Yuan To Dozens Of Yuan
- Led Light Source: SMD 5630
- Remote Control: Yes

Product Description

Regarding the linear light embedded black LED gypsum ceiling light trough living room corner aluminum profile slot product, the following is a detailed introduction:

Our Product

1. Product Overview

The linear light embedded black LED gypsum ceiling light trough is a commonly used lighting solution in modern home decoration. It combines the high efficiency and energy saving of LED with the durability of aluminum profiles. At the same time, the black appearance is perfectly integrated with the gypsum ceiling, providing elegant and uniform lighting effects for spaces such as living rooms. In particular, the design of the corner aluminum profile slot makes installation easier and can adapt to installation requirements at different angles.

2. Product Features

Efficient and energy-saving: The LED light source has a higher energy efficiency ratio than traditional lighting methods, which can

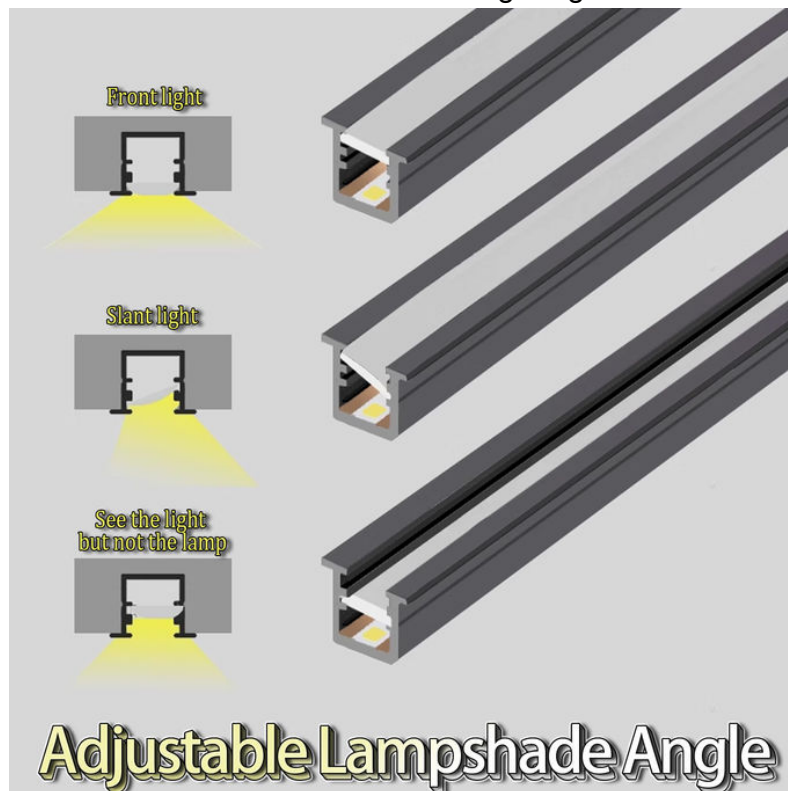

significantly reduce energy consumption and conform to the energy-saving and environmental protection concept of modern homes.

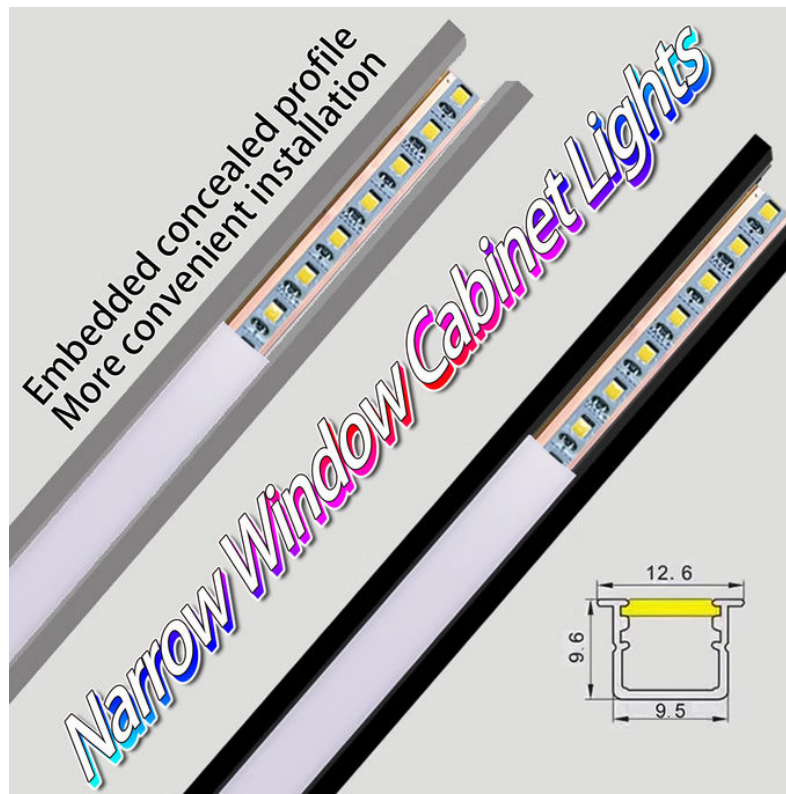

Beautiful and generous: The black aluminum profile is integrated with the gypsum ceiling, with simple and smooth lines, which not only provides good lighting effects, but also enhances the overall beauty of the home.

Easy installation: The corner aluminum profile slot design makes the installation process simpler and faster, and the lamps can be stably installed without complicated construction steps.

Durable and reliable: Aluminum profiles have good corrosion resistance and deformation resistance, which can ensure that the lamps maintain stable performance during long-term use.

Applicable to multiple scenarios: Not only suitable for family spaces such as living rooms, but also for commercial places, office areas and other scenarios to meet different lighting needs.

3. Product specifications and parameters

Since the specifications and parameters of specific products may vary depending on the brand, model and production batch, the following provides general reference information:

Material: black aluminum profile, gypsum board

Light source type: LED

Color: black (aluminum profile), white (gypsum board, can be customized according to needs)

Dimensions: Specific dimensions such as length, width, height, etc. need to be customized according to actual needs (such as 1 meter aluminum trough, etc.)

Voltage: Generally low-voltage DC power supply (such as $\leq 36V$) to ensure safe use

Color temperature: You can choose light sources with different color temperatures according to your needs, such as white light 6000K, neutral light 4000K, warm light 3000K, etc.

Illumination area: Determined according to the actual installation location and number of lamps

4. Installation and maintenance

Installation: Before installation, make sure that the ceiling is flat and free of debris, and install it according to the product manual or the guidance of professionals. Pay attention to maintaining good contact between the lamp and the power supply, and ensure that the installation position is stable and reliable.

Maintenance: Clean the surface of the lamp regularly to avoid dust and dirt accumulation affecting the lighting effect. If the lamp is found to be damaged or its performance has deteriorated, it should be replaced or repaired in time.

5. Precautions

During the purchase and use process, please make sure to choose

regular brands and channels (such as YSENLED) to avoid purchasing counterfeit and inferior products.

Please follow the product manual or the guidance of professionals during installation to ensure correct installation.

Please pay attention to electrical safety during use to avoid dangerous situations such as electric shock.

In summary, the linear light embedded black LED gypsum ceiling light trough living room corner aluminum profile card slot product is a modern home lighting solution that integrates beauty, practicality and durability. Through reasonable selection and installation, it can bring a more comfortable and warm lighting environment to the family space.
