Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YSR60X5630RA-F3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: T/T
- Supply Ability: 100,000 meters per week

Flexible Ribbon Structure Diy Your World

The flexible structure allows for easy plastic installation according to the object and the high-efficiency and high-quality light easily switches the home atmosphere

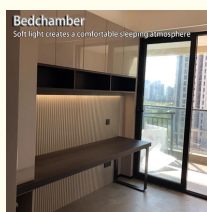

Product Specification

- Safety Certifications: CE, RoHS, Etc.
- Width: 10mm
- Materials: High-quality Aluminum Alloy
- Waterproof: Yes
- Color Temperature: 3000K/4000K/6000K
- Cuttable Length: Every 3 LEDs
- Price Range: From A Few Yuan To Dozens Of Yuan
- Cct: 6000-6500/2800-3000
- Thickness: 0.08in
- Customized Design: Available
- Led Qty: 72LED/M
- Wattage: 14.4W
- Heat Dissipation Design: Good Thermal Conductivity
- Application: LED
- Lamp Body Material: Copper

Warm Companionship Is Available At The Touch Of A Button

Product Description

Linear light embedded black LED gypsum ceiling light trough living room positive angle aluminum profile card trough product is a decorative element that combines modern design and efficient lighting. It is widely used in the decoration of homes, businesses and public spaces. The following is a detailed introduction to the product:

1. Product Overview

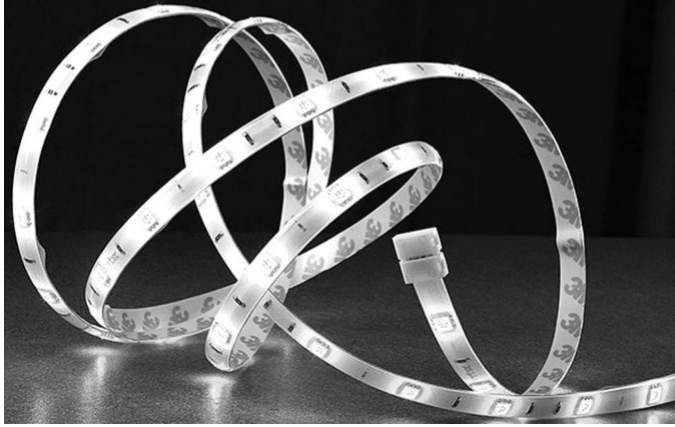

This product is mainly composed of black LED light source, recessed light trough, gypsum ceiling, positive angle aluminum profile slot and other components. Its design aims to create a warm and comfortable lighting environment through soft and uniform linear light effects, while enhancing the

Our Product Introduction

overall beauty and layering of the space.

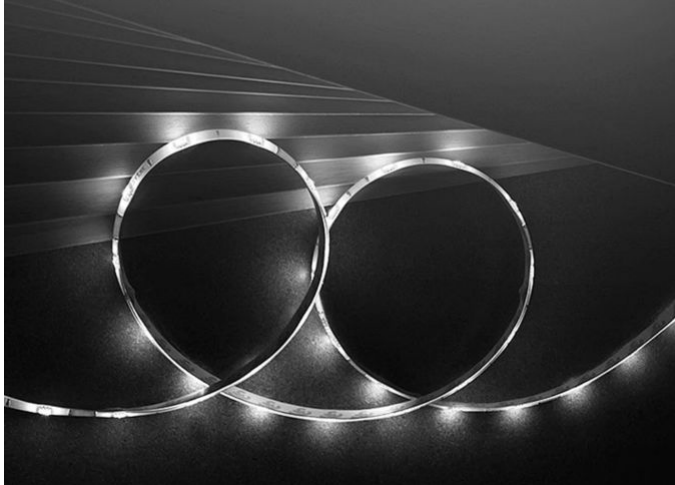

Applicable Scene >>>

Any place you want to decorate indoors: corridor walls, ceilings, computers, TV edges, stairwells, windows, birthday parties, romantic dinners and many other scenes.

Flexible Ribbon Structure Diy Your World

The flexible structure allows for easy plastic installation according to the object, and the high-efficiency and high-quality light easily switches the home atmosphere

2. Product features

High efficiency and energy saving: Using LED light source, it has the characteristics of low energy consumption and high brightness. Compared with traditional lighting methods, it can significantly save energy and reduce usage costs.

Comfortable lighting: Linear lighting is soft and non-dazzling. It can evenly illuminate the space and create a comfortable and pleasant lighting atmosphere.

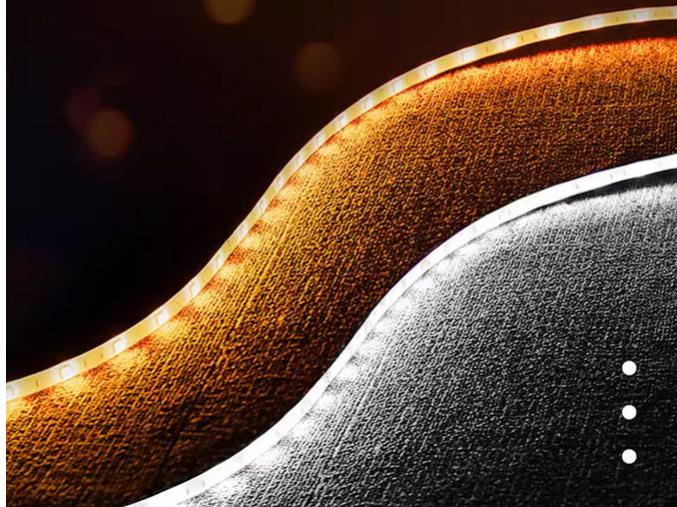

Beautiful and elegant: The black aluminum profile card slot is perfectly integrated with the gypsum ceiling, with smooth lines and a simple and elegant appearance, which can improve the decoration level of the space.

Easy to install: The embedded design makes the installation process easier and faster, without complicated construction steps, and is suitable for various decoration scenarios.

Durable and reliable: Made of high-quality materials with good corrosion resistance and weather resistance, it can work stably for a long time and reduce maintenance costs.

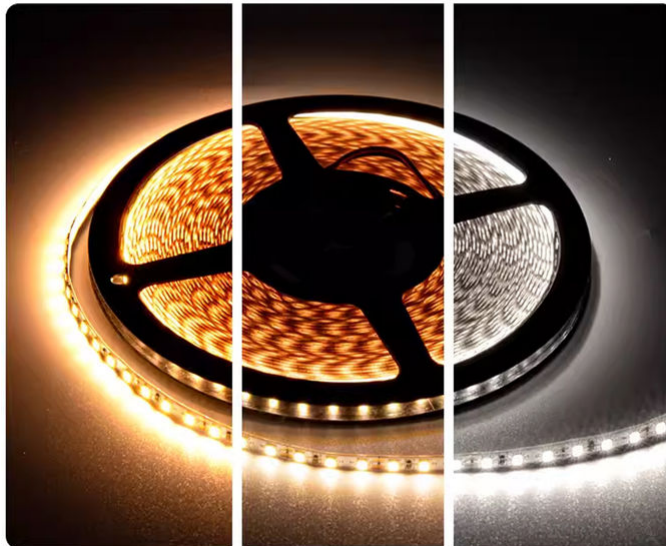

Flexible Cutting And Lighting Aesthetics Both Inside And Outside

Bright LED chip design, safe and flame-retardant material

Three Light Colors For Your Choice

Combine lighting and scenes to feel the dynamic feeling

3. Product specifications and parameters

Since product specifications from different manufacturers and brands may vary, here are some common specifications and parameter ranges for reference:

Material: black aluminum profile, gypsum board, LED light source, etc.

Size: The length, width and depth of the light trough can be customized according to actual needs. Common lengths are 1 meter, 2 meters, etc.

Color temperature: LED light sources with different color temperatures can be selected according to needs, such as warm white light, neutral light, cool white light, etc.

Power: Choose LED light sources of different powers according to the length of the light trough and the required brightness.

Protection level: It generally has a high waterproof and dustproof level and is suitable for use in a variety of environments.

Bedchamber

Soft light creates a comfortable sleeping atmosphere

Dining room

Clear and bright light

4. Application scenarios

This product is widely used in the decoration of family living rooms, bedrooms, study rooms and other spaces, and can also be used for lighting decoration in commercial places such as shopping malls, hotels, restaurants, etc. In particular, installing linear lights embedded in the black LED plaster ceiling light trough in the sunny corner of the living room can significantly improve the visual effect and comfort of the space.

5. Precautions

Before purchasing, you need to select appropriate specifications and parameters based on actual needs and space size.

During installation, ensure that the power supply is connected correctly to avoid safety accidents such as electric shock.

During long-term use, regular cleaning and maintenance should be noted to keep the lamps in good working condition.

To sum up, the linear lamp embedded black LED gypsum ceiling light trough living room positive angle aluminum profile slot product has been favored by the majority of consumers for its high efficiency, energy saving, comfortable lighting, and beautiful appearance. When selecting and using this product, it is recommended to consider it comprehensively based on actual needs and budget.
