Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YS-R120X2835RAF3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100,000 meters per week

Three Light Colors Are Optional
Meet Different Lighting Needs

Product Specification

- Leds Type: 5050
- Hs Code: 9405409000
- Color Temperature: 3000-10000 K
- Corlor: White Color, RGB For Option
- Led Quantity: 300
- Quantity: 5m/roll
- Batteries Included: No
- Input Power: 120V-240V
- Power Input: AC24V-36V
- Cuttable Length: Every 3 LEDs
- Warranty: 1 Year
- Power: 60W/roll
- Service: OEM ODM Available
- Cct: RGB
- Input Frequency: 50/60 HZ

Can Be Installed Both
Vertically And Horizontally

Product Description

The following is a detailed introduction to the LED flexible silicone light strip soft sleeve 24V12 low-voltage surface-mounted outdoor waterproof embedded linear light strip indoor product:

Our Product

1. Product Overview

The LED flexible silicone light strip soft sleeve is a light strip sleeve made of silicone material. It has good flexibility and waterproof performance and is suitable for various outdoor and indoor lighting scenes. The light strip is powered by 24V or 12V low voltage to ensure safety during use. At the same time, its linear design makes installation more convenient and can be easily embedded in various grooves or attached to a plane.

Easy And Hassle-free Installation

Easy To Install And Disassemble Saving Worry And Effort

Three Light Colors Are Optional Meet Different Lighting Needs

2. Product Features

Low voltage safety: It uses 24V or 12V low voltage power supply to avoid the safety hazards caused by high voltage. It is suitable for places such as homes and offices that require safe lighting.

Waterproof performance: The silicone sleeve has good waterproof performance and can effectively prevent moisture intrusion to ensure the normal operation of the light strip in a humid environment.

Flexible and bendable: The silicone material makes the light strip have good flexibility and can be bent and shaped at will to meet various complex installation requirements.

Embedded design: The linear light strip design can be easily embedded in various grooves or gaps to achieve concealed lighting effects.

Applicable for surface installation: In addition to embedded installation, the light strip is also suitable for surface installation and can be directly attached to flat surfaces such as walls, ceilings, etc.

Can Be Installed Both Vertically And Horizontally

Vertical Installation

Horizontal Mounting

3. Product specifications

Voltage: 24V or 12V low voltage

Power: It varies according to the specific model and length. Generally, the power per meter is between a few watts and more than ten watts.

Size: The width and height of the light strip can be customized according to specific needs. Common sizes are 10mm, 12mm, 15mm, 20mm, etc., and the

height varies according to the design of the luminous surface.

Luminous color: Including warm white, neutral light, white light and other colors to meet the lighting needs in different scenes.

Light source type: LED light source is used, which has the advantages of high brightness, low power consumption and long life.

5. Precautions for use

Inspect before installation: Before installation, make sure the power is turned off and check whether the light strip is intact.

Waterproof treatment: When used outdoors, make sure that the connection between the light strip and the power supply is waterproof to prevent moisture from invading.

Avoid squeezing: During installation and use, please avoid excessive squeezing or bending of the light strip to avoid affecting its service life.

Regular maintenance: Please check the working status of the light strip regularly. If any abnormality is found, please replace or repair it in time.
