

LED Light Strip 12v Low Voltage Super Bright Patch Self-Adhesive Truck 24 Volt Light Trough Linear Light Line Light Linear Light Strip

Our Product Introduction

for more products please visit us on led-stripslights.com

Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YSR60X5630RA-F3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100,000 meters per week

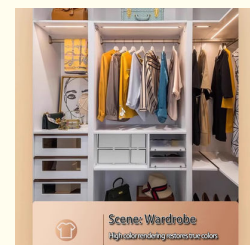

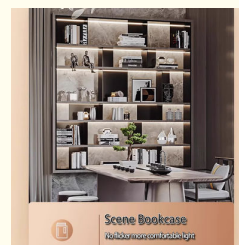

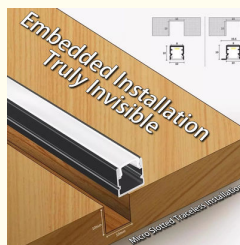

Product Specification

- Waterproof: Yes
- Strip Length: Customizable
- Lumen: 50-55LM/CRI 85
- Ip Rating: IP20/IP65/IP67
- Cuttable Length: Every 3 LEDs
- Pcb: Aluminum
- Lifetime: 50,000 Hours
- Length: 5 Meters
- Warranty: 2-5 Years
- Cri: 80+
- Led Chips: High-power
- Led Quantity: 60 LEDs/m
- Color: White
- Thickness: 0.08in
- Materials: High-quality Aluminum Alloy

Product Description

LED light strips, especially 12V low-voltage super-bright self-adhesive patches and 24-volt linear lights, line lights or linear light strips suitable for trucks, are a type of lighting products widely used

Our Product

in advertising decoration, home lighting, commercial places and other fields. The following is a detailed introduction to this type of product:

1. Product Overview

Type: LED light strips, including 12V and 24V voltage specifications to meet different application requirements.

Features: low voltage, super bright, self-adhesive patches, easy to install and maintain.

Application scenarios: billboards, interior decoration of carriages, home ceilings, counter displays, etc.

2. Product specifications

Voltage: There are mainly 12V and 24V, suitable for occasions with different voltage requirements.

LED lamp beads: high-brightness LED lamp beads are used to ensure lighting effects.

Number of lamp beads: The number of LED lamp beads on each meter of light strip may vary, depending on the product model and specifications.

Length: It can be customized according to customer needs, and common lengths are 1 meter, 5 meters, 10 meters, etc.

Color: including white, warm white, neutral light, cold white and other color temperature options, as well as full-color color-changing styles such as RGB.

3. Product Features

Self-adhesive design: with self-adhesive glue on the back, it can be directly pasted on a flat surface, which is easy and quick to install.

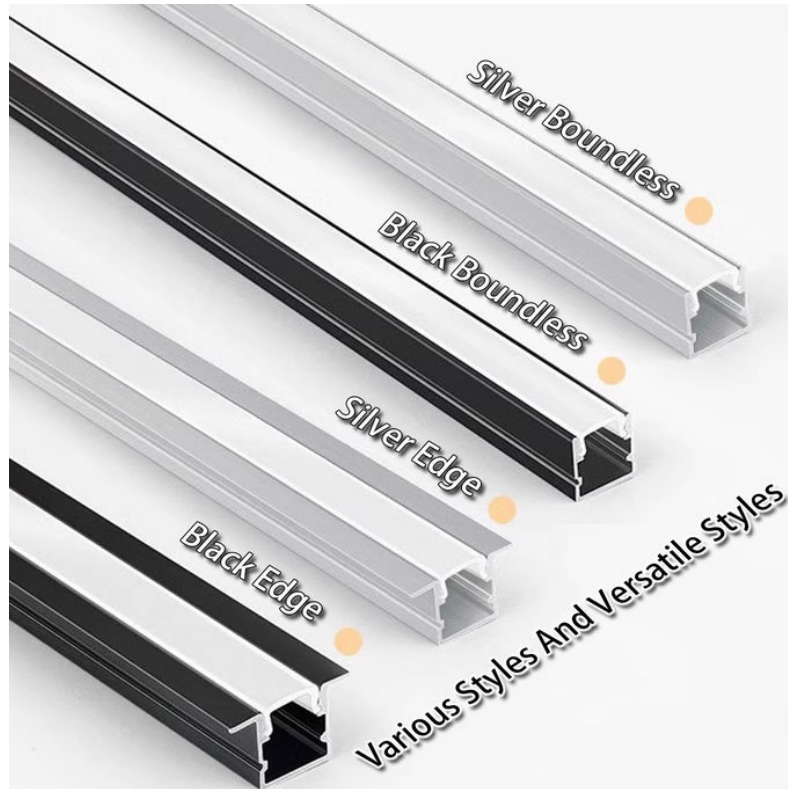

Low-voltage safety: low-voltage power supply is adopted, which is safer and more reliable to use.

Energy saving and environmental protection: LED light strips have the

characteristics of high efficiency and low power consumption, which conforms to the concept of modern green lighting.

Super long life: LED lamp beads have a long life of up to tens of thousands of hours, reducing the frequency and cost of replacement.

Waterproof and dustproof: Some products have waterproof and dustproof functions, suitable for outdoor or humid environments.

4. Installation and maintenance

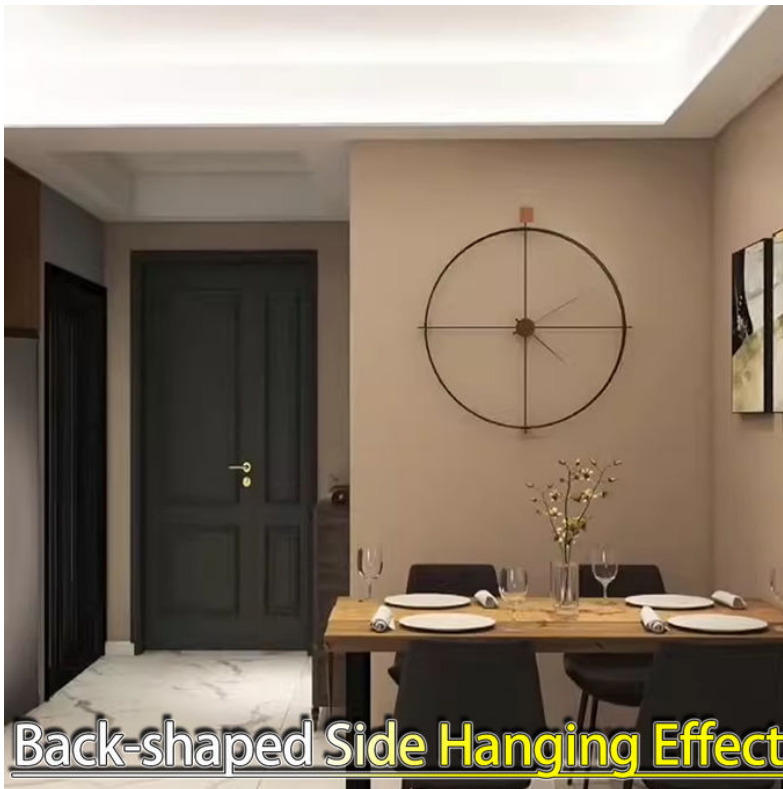

Installation: clean the installation surface, tear off the protective film on the back of the light strip, paste the light strip in the designated position, and connect the power supply.

Maintenance: regularly check whether the light strip is loose or damaged, and replace the damaged part of the light strip in time. Avoid overheating caused by long-term continuous use, which affects the service life.

Scene: Wine Cabinet

No light spot: even light output more high-end

Back-shaped Side Hanging Effect

5. Precautions

Voltage matching: ensure that the power supply voltage matches the light strip voltage to avoid damage caused by excessively high or low voltage.

Usage environment: Avoid using in extreme temperature or humid environment to avoid affecting the performance and life of the light strip.

Storage conditions: Store in a dry, cool place, avoid direct sunlight and high temperature.
