

Embedded Installation LED Strip Light with High-power SMD5730 LED Chips and 50,000 Hours Lifetime for Wine Cabinets and Wardrobes

Our Product Introduction

Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YS-R120X2835RAF3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: L/C,D/A,D/P,T/T,Western Union
- Supply Ability: 100,000 meters per week

Product Specification

- Highlight: **Embedded Installation LED Strip Light, High-power SMD5730 LED Flexible Strip, 50,000 Hours Lifetime Cabinet Lighting Strip**

Product Description

Embedded Wine Cabinet & Wardrobe LED Strip Lighting Display Shelf

Wine Cabinet Atmosphere Light Strip
Wardrobe Atmosphere Light Strip

Light Source	LED	Processing Performance	Easy To Cut, Drill, Bend
Power	24W	Lifetime	50,000 Hours
Lumen	50-55LM/ CRI 85	Led Chips	High-power
CCT	2800-7500K	Safety Certifications	CE, RoHS, Etc.
Led Chip	SMD5730	Width	10mm
Warranty	2 years, 1 Year	Voltage	12V
Materials	High-quality Aluminum Alloy	Led Quantity	600pcs/ Roll
Lamp Power	14.4W/M, 12W/M, 57.6W/M, 60W		

Embedded cabinet lighting strips are essential for elevating the sophisticated aesthetic of modern homes. Designed to address the distinct requirements of wine cabinets, wardrobes, and display shelves, these lighting solutions combine functionality with elegant design.

Application Scenarios and Lighting Effects

Wine Cabinet Display

We recommend utilizing 4000K natural light or 3000K warm yellow light. By embedding the light strips along the inner edge of shelves or behind glass back panels, the lighting complements the glassy texture of wine bottles, creating a sophisticated, intimate ambiance reminiscent of high-end restaurants.

Wardrobe Lighting

Prioritize motion-sensing light strips that automatically illuminate when cabinet doors open. This resolves visibility issues when retrieving items from deep within the wardrobe. A color temperature of 4000K (approximating natural daylight) is ideal for accurately distinguishing clothing colors.

Display Shelving

Ultra-narrow linear lights are highly suitable for display applications. Designed to conceal individual LED beads, they achieve a minimalist "light-only, no-fixture-in-sight" effect that effectively highlights the contours and details of displayed items.

Installation Methods and Style Options

Embedded Installation (Requires Grooving)

Offers the highest aesthetic appeal with light strips sitting flush with wooden panel surfaces. This method requires pre-planning and the creation of grooves and wiring channels during the cabinet manufacturing stage for a seamless integrated look.

Surface-Mounted Installation (Triangular Light Strips)

Ideal for retrofitting into existing cabinetry. Typically installed within the inner corners of cabinets, these strips utilize a 45-degree angled beam to provide effective illumination without shining directly into the viewer's eyes, making them perfect for cabinet upgrades.
