Banquet Hall 24v60 Light 10-Segment Breakpoint Continuous RGBW Magic Water Light Strip

Professional RGBW Banquet Hall Lighting Solution

Premium 24V addressable LED strip designed specifically for banquet halls, stages, and architectural lighting with advanced control capabilities.

Technical Specifications

Color Options	Red/Yellow/Blue/Green/White/Warm White
Wavelength / CCT	2800-7500K
LED Quantity per Roll	300 LEDs/roll
Operating Voltage	DC24V
Power Consumption	72W/roll
Dimensions per Roll	12x5000 mm/roll
Lumen Output & CRI	50-55 LM with CRI 85

Professional Features

This professional-grade 24V addressable LED strip features 60 LEDs per meter with 10 independently controllable segments, making it ideal for creating sophisticated flowing and chasing light effects in commercial settings.

24V System: Enables longer single-run connections and eliminates voltage drop issues common in large installations

10 Segments per Meter: 6 LEDs form each pixel (10 pixels/meter) for precise control and intricate lighting patterns

Breakpoint Resume Technology: Automatically bypasses faulty components to maintain operation of the entire strip - crucial for banquet hall reliability

RGBW 4-in-1 Technology: Dedicated white light channel produces pure whites and superior pastel colors compared to standard RGB strips

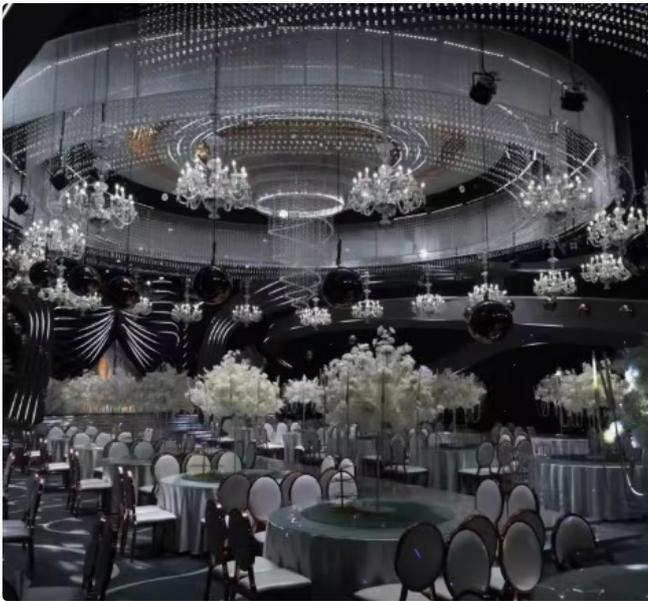

Installation & Professional Recommendations

Power Supply: 14.4W-18W per meter consumption requires high-output 24V switching power supply for large installations

Power Injection: Recommended every 5-10 meters to maintain uniform brightness across long runs

Heat Management: Aluminum channel installation recommended for optimal heat dissipation and extended LED lifespan

Color Temperature Selection: RGB + 3000K (Warm White) recommended for banquet halls to create inviting atmospheres
